

# Other Services

## Systems Review

Blueblood Solutions are about ensuring you have reliable IT systems working effectively for your business. Our experience and knowledge means you'll get the right advice on the hardware and software you need to minimise costs and increase productivity.

To recommend the right IT support solutions for you we need to understand your IT environment and business requirements.

## Bonding Implementation Service

Need faster internet? Sick of costly internet outages?

Blueblood Solutions can provide a bonding solution to combine multiple internet connections for both speed and redundancy.

The Blueblood Bonding service includes:

- ✓ Initial site inspection and meeting
- ✓ Liaison with the bonding service provider for provisioning
- ✓ DNS and other configuration changes required for implementation of the service
- ✓ Setup of reverse DNS records (if required)
- ✓ Second site visit to install a bonding device and reconfigure existing network equipment

## Consulting Services

Blueblood provides consulting services from assessment of IT infrastructure needs, issue identification, preparation of recommendations through to implementation and testing of the recommended solutions.

Blueblood has a broad range of consulting experience across the following areas:

- ✓ Server and workstation hardware and software
- ✓ Network infrastructure
- ✓ Email and internet connectivity
- ✓ Print services
- ✓ Backup and disaster recovery
- ✓ IT Documentation

## Hardware and Software Sales and Installation

We partner with leading vendors to bring you the best solutions on the market. From sophisticated hardware solutions to general software licensing, we understand all aspects of ICT. We can provide complete solutions including supply and installation of hardware and software, from the design phase, right through to end user support.

## Domains, DNS, Email and Web Hosting Services

Blueblood Solutions can provide virus protection licensing as well as cloud-based email filtering solutions which prevent spam and viruses from reaching your email server.

## Email Filtering and Virus Protection

Blueblood Solutions can provide virus protection licensing as well as cloud-based email filtering solutions which prevent spam and viruses from reaching your email server.

## Cloud Licensing and Migrations

For customers wishing to move to a cloud-based environment, Blueblood offers Office365 licensing services. Blueblood also provides migration services to move clients from an MS Exchange email environment to an Office365 implementation. Data migrations are also on offer.
